

Segway™ Human Transporter. The performance story.

To learn more about Segway HT's capabilities, visit us at www.segway.com.

Segway has three product offerings, optimized for:

e Series:
cargo carrying.

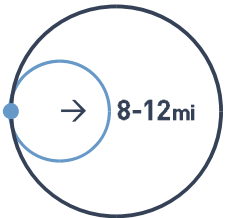

i Series:
range and terrain.

p Series:
dense environments.

Top Speed (e) 12.5 mph (20 kph) (i) 12.5 mph (20 kph) (p) 10 mph (16 kph)

Segway HT is quick enough to compress time and space without disrupting the pedestrian environment. Speed can easily be controlled by the user, in addition each Segway HT comes with three distinct keys that allow the top speed to set according to the riding environment.

Range (on a single charge) (e) 8-12 miles (13-19 km) (i) 8-12 miles (13-19 km) (p) 6-10 miles (9-16 km)

The range for each Segway HT model varies with terrain and riding style. Proper battery care, riding on flat surfaces, and respecting the speed limiter will help increase your range.

Turning Radius: zero

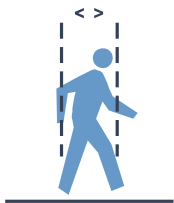

One characteristic of a pedestrian is the ability to turn in place without impacting any nearby person or object, something few vehicles can do. By balancing on a single axle, Segway HT users act like pedestrians. The wheels have the ability to rotate in opposite directions, which enables the machine to turn in place.

Payload

Rider: (e) 250 lbs (113 kg) (i) 250 lbs (113 kg) (p) 200 lbs (91 kg)
Total Payload: (e) 260 lbs (118 kg) (i) 260 lbs (118 kg) (p) 210 lbs (96 kg)
(Passenger + Cargo)

In order for Segway HT to be the optimal local travel solution, it has to have carrying capacity for users, packages, and cargo.

Space

Platform Height: (e) 8 in (21 cm) (i) 8 in (21 cm) (p) 6 in (17 cm)
Footprint: (e) 19 x 25 in (48 x 64 cm) (i) 19 x 25 in (48 x 64 cm) (p) 16 x 21 in (41 x 55 cm)

We designed Segway HT to take up no more space than the average person. It's about as wide as a person's shoulders and raises you only 6-8 inches off the ground.

Weight (e) 95 lbs (43 kg) (i) 83 lbs (38 kg) (p) 70 lbs (32 kg)

Portability was a key design objective. That is why we made the Segway HT i and p Series light enough to handle, small enough to store two in the trunk of a midsize sedan, and collapsible enough to fit in tight storage spaces.
