SEGWAY

Simply moving

You've been here before, but only in your imagination. You're gliding on air, above the crowd with a clear view of everything ahead. At the same time, you're with the crowd in perfect sync. No obstacles. No barriers. You find yourself traveling farther and seeing more. Go fast. Go slow. Go anywhere. This is how you envisioned travel sometime in the future. But this isn't the transportation of tomorrow. It's Segway, today.

Mobility, evolved

Like nothing you imagined

Serious transportation? Yes. Fun? Absolutely.

Like any invention that's ahead of its time, the Segway Personal Transporter (PT) is often misunderstood. The gleeful smiles of Segway PT riders may have created an impression that this is... well... a toy. But make no mistake. While a Segway PT is incredibly fun to ride, it is serious transportation for people on the move in today's changing world.

You can go for miles and miles.

The Segway PT can take you places that a car or bicycle can't — including inside many stores, office buildings, businesses, airports, elevators, and trains. Although they're ideal for short jaunts of 5 miles/8 km or less, Segway PTs can travel as far as 24 miles/38 km on a single battery charge, depending on terrain, payload, and riding style.

It doesn't replace walking. It replaces everything else.

Ride a Segway PT and revel in the joys of being active while you leave the hassles of cars and mass transportation behind. Travel on sidewalks and paths, side-by-side with friends on foot, and carry on a comfortable conversation. Move easily through crowds without invading others' personal space. While you glide along in harmony with those around you, you'll also be at peace with the environment thanks to the Segway PT's zero emissions and zero need for gas.

The Zen of Segway

Suddenly, thought and action are one.

Stand on a Segway PT and it remains stationary and upright, balancing you appropriately. Shift your weight forward, backward, left, or right, and LeanSteer™ technology immediately sends you gliding in the precise direction you want to go, at exactly the speed you want to move. Straighten up and you gently stop. Segway engineers call it "closed-loop dynamic stability control." You'll call it magic.

Natural momentum.

A Segway PT quickly feels like an extension of your own body, making it easy for you to remain confident, comfortable, and in control — even when it's transporting you at speeds of up to 12.5 mph/20 kph, or about the pace of a brisk run. How long does it take to "become one" with a Segway PT? For most people, it's a matter of minutes. For some, even less.

Move. Be moved.

On a Segway PT, your routine is no longer routine. The everyday activities of life become experiences worth savoring, and you'll see that familiar stretch between Point A and Point B in a whole new light. Step up to a Segway PT and you will be transported — in more ways than one.

Segway in the real world

Segway Everyday

"I live in a typical suburban community, miles away from work, shopping or services," says Douglas B. Luckie, Ph.D.

"Having a car is still essential. But since I recently purchased a Segway PT, I've been surprised by how much I use it instead of my car." In addition to the sheer enjoyment of riding, Luckie has been delighted by his savings on parking, gasoline, and automobile maintenance. "At first I just used it for errands around my neighborhood, but it wasn't long before I started riding it to work and back – about a 10-mile round trip. The Segway PT is the ultimate 'convertible.'"

"My favorite part of riding my Segway PT is cruising along the sidewalk past stopped traffic. Talk about liberating! And it's really fun to find new shortcuts through parks and shopping centers – there are parts of my city that I never knew existed."

“My Segway PT makes shopping and errands so much more fun, efficient, and comfortable. I can get everywhere I need to go without the hassles of traffic and parking, plus I can stop and visit with people along the way.”

Pam Gotcher
Niceville, FL

“I regularly glide past stopped traffic on my way to work. My commute isn’t an inconvenience, it’s a chance for me to clear my mind and enjoy a part of my life that others dread.”

Shawn Deay
Los Angeles, California

Segway in the City

The city on a Segway PT is the city transformed. "It makes getting around so much easier — and so much more fun!" says Jeremy Stevens.

"My 35-block commute is a whole different experience — people smile at me like we're old friends and ask me about my Segway PT. I glide through pedestrian traffic without a hitch — it's as if it knows where I'm going before I do. Plus, I can spend a whole day running errands without getting tired."

The range of a Segway i2 translates into 480 city blocks for urban dwellers. But you're not limited to the street. You can ride indoors, take it into an elevator, down to your office, and back to your home at the end of the day.

"I challenged three friends to race me to a restaurant. One took a cab. One took the metro. The third took a bus. I rode my Segway PT and beat them all by a good 15 minutes. I even had time to top off the battery before they showed up!"

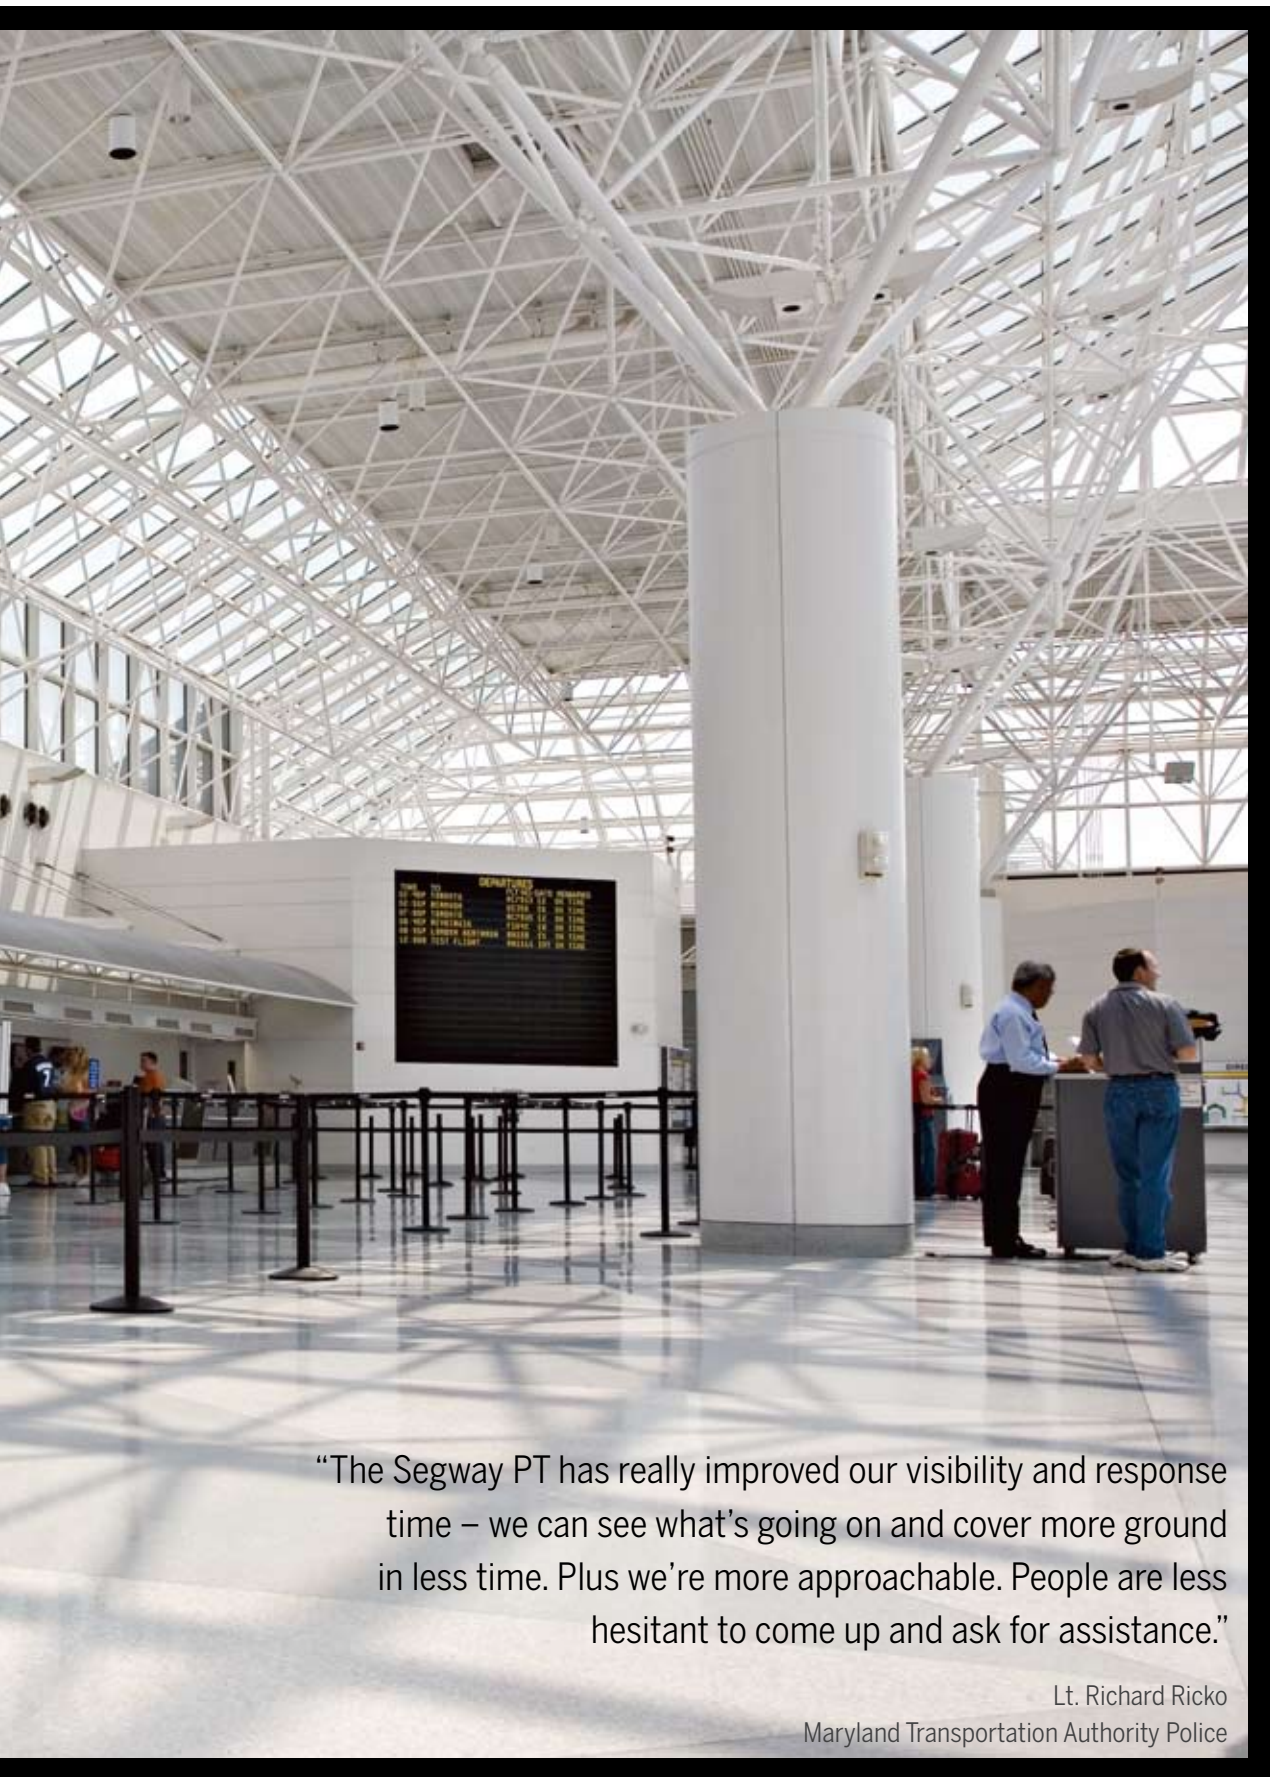

Segway at Work

“Squad cars keep us at a distance from people and, even when we’re on foot or bicycle, people tend to stay away,” says Officer Pierre Pyle of the Annapolis Police Department. “But when we ride Segway PTs, folks in our community come up and say hi. They get to know us, and we get to know them. Plus, we can see and be seen easily and get where we need to go quickly – even with all our gear.”

A few miles away in a regional manufacturing facility, production managers and security officers cover miles of assembly lines, warehouses, and loading docks with greater efficiency, even into areas where golf carts and bicycles can’t go.

“We’re using Segway PTs to supplement our walking patrols,” says Joe Marcello, Executive VP, National Operations of IPC International. “Our officers cover more territory and respond more quickly to crises, and at the end of a shift they have energy to spare.”

“The Segway PT has really improved our visibility and response time – we can see what’s going on and cover more ground in less time. Plus we’re more approachable. People are less hesitant to come up and ask for assistance.”

Lt. Richard Ricko
Maryland Transportation Authority Police

“Noisy off-roading isn’t for me. The x2 is quiet and allows me to get gritty without damaging the trail. You’d be amazed at the wildlife I see when I head out.”

Lisa Taylor
Taos, New Mexico

Segway in the Wild

While the Segway x2 is rugged enough for military units who use it to carry heavy gear into demanding environments, it's great for recreational use as well, allowing you to enjoy the outdoors with friends who accompany you on foot. It's so quiet that you can carry on a conversation as you take to the trail.

"I hike. I bike. And I love off-road adventures. My x2 is the best of all three." So says Mike Lund as he loads his x2 onto the Segway Hauler mounted on the back of his SUV for another weekend in the wild.

"No matter what sort of terrain I encounter — trails, fire roads, fields, woods, whatever — my x2 can take it. Hills are no problem. It loves getting muddy. And the knobby tires power through gravel and sand."

The sociability factor is making the Segway x2 a familiar sight on many golf courses as well. Instead of breaking up a foursome into two golf carts, the x2 Golf allows four players to travel the length of a course side by side, and enjoy a ride that's almost as much fun as the game itself.

Segway was founded on a vision of eco-friendly, short-distance transportation alternatives. Our mission is simple: to give our customers a green, personal transportation experience that transforms the way people work, play, and live. We promise all Segway owners ease and efficiency, and they in turn integrate environmental consciousness into their daily routines. Together, we make a world of difference.

Environmental renewal. Urban revival.

Keeping it Green.

The electric Segway PT is already eco-friendly. Segway Inc.'s Renewable Energy Credit (REC) Program—with your help—encourages the use and development of clean energy. For every participating Segway PT owner, Segway purchases enough RECs for a year's worth of use—about 200 kilowatt hours. This way, Segway helps mitigate the negative environmental effects of charging a Segway PT.

With all the Renewable Energy Credits (RECs) that Segway purchases, it compels utility companies to use power generated by cleaner, renewable sources like wind, water, or geothermal. Every kilowatt hour of electricity obtained from renewable sources is one less kilowatt hour generated by CO₂-producing fuel—so the more RECs Segway purchases, the more we help to reduce our dependence on fossil fuels.

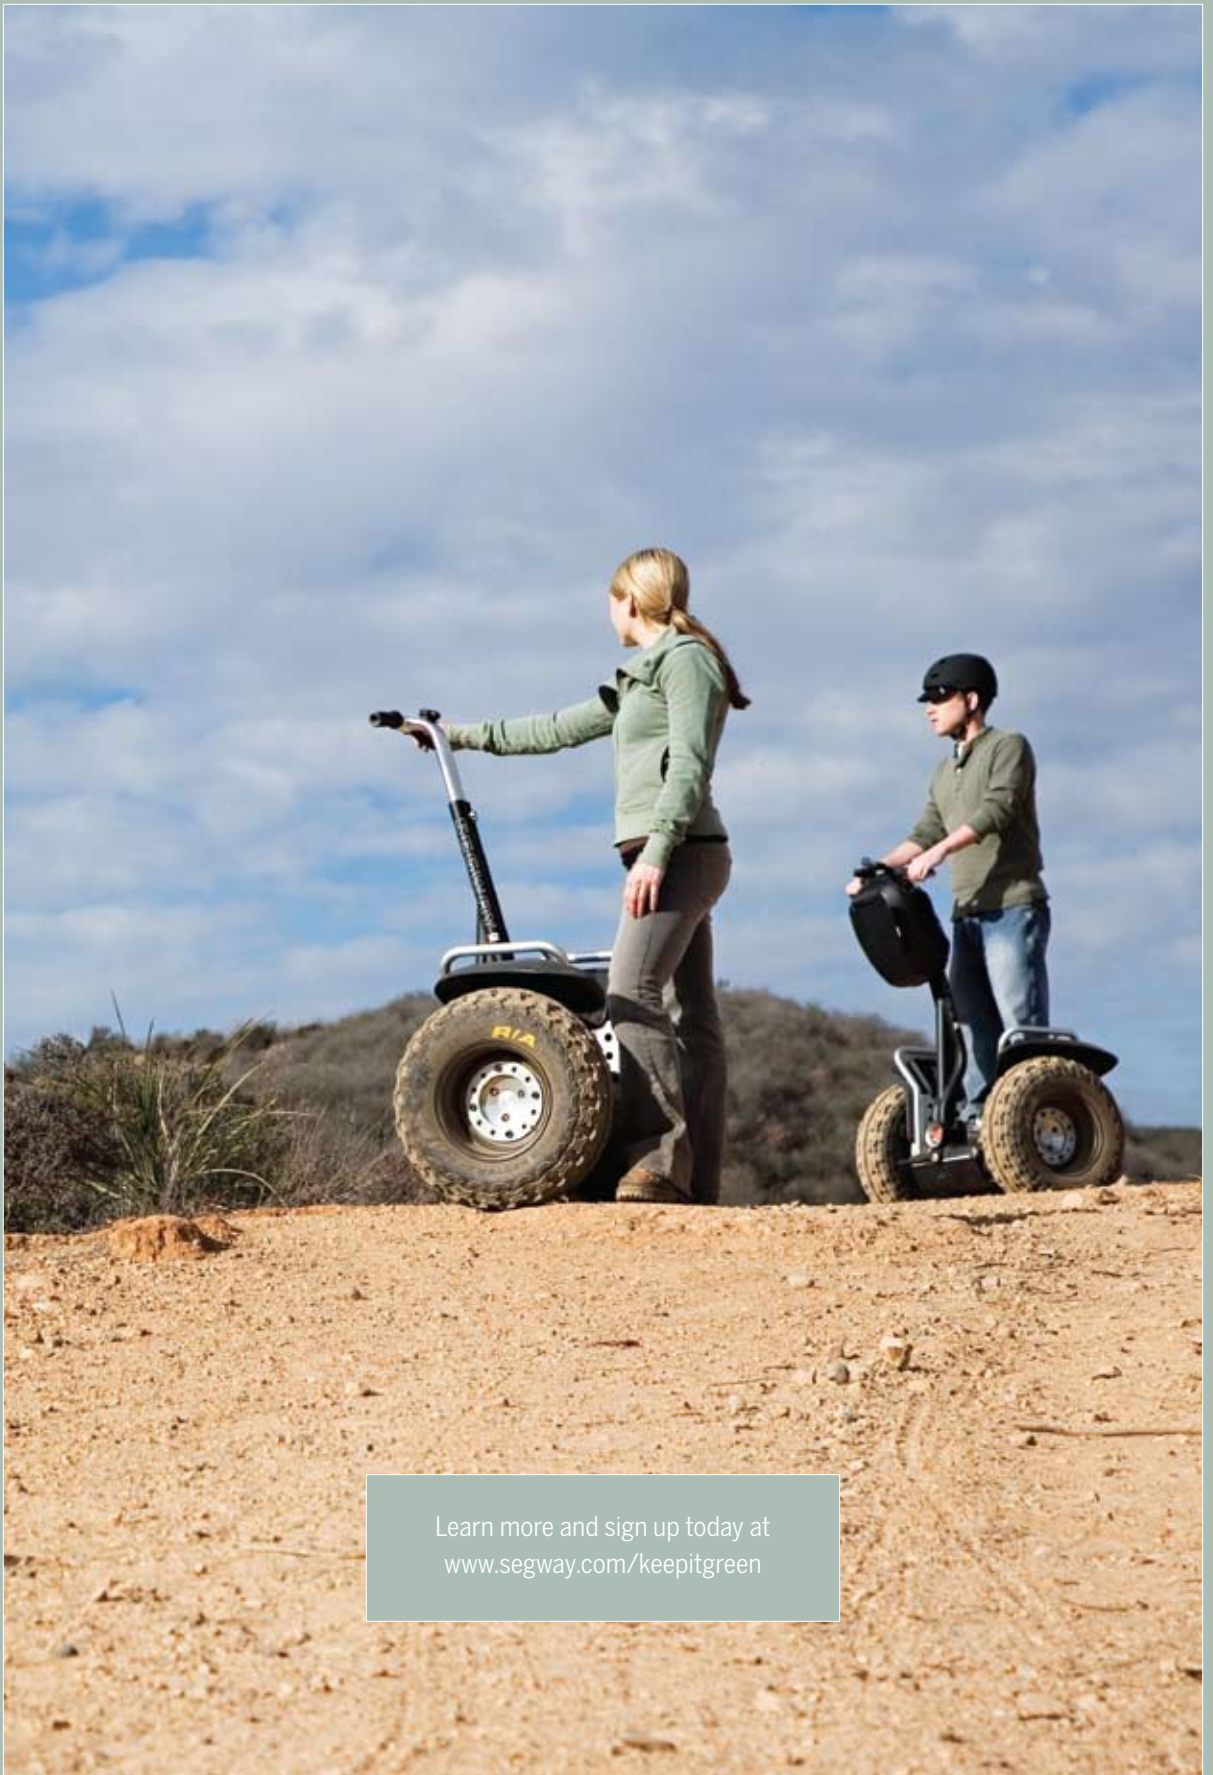

Segway PT as compared to the average American car.

When used for a regular commute¹, a Segway PT is 11 times more energy-efficient than the average American car². Consider these differences in operating cost and carbon footprint:

Segway PT	The average car
	
CO₂ Output/year <input type="text" value=""/>	CO₂ Output/year <input type="text" value=""/>
Electricity Cost/ year <input type="text" value=""/>	Gasoline Cost/year <input type="text" value=""/>
<p>Enjoy a stress-free commute and be free from public transportation schedules. Utilize a singular door-to-door transportation solution.</p>	<p>Don't forget about the hassles of parking, frustration with congestion, and significant maintenance costs associated with automobile ownership.</p>

Read a white paper on "The role of the Segway PT in Emissions Reduction and Energy Efficiency" at www.segway.com/efficiency

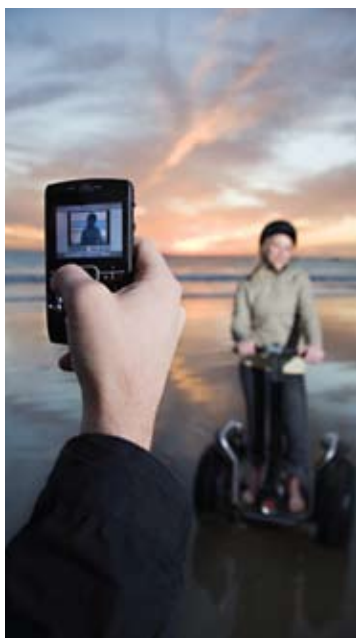

¹ Estimates based on average commute of 10 miles per day, 2,500 miles annually.
² Assumes realization of average efficiency. When car is first started and driven only for short distances, actual efficiency is typically poorer.

More than a way of moving, Segway is a way of life. When you bring the ease, simplicity and freedom of a Segway PT into your routine, you're joining thousands of other people whose lives have changed for the better. It's about common values—Segway PT owners share a vision of personal mobility in harmony with the environment and the fast-pace of city living. Wherever you go, the Segway lifestyle gives you the momentum to keep moving forward and making progress.

Life. Style. Segway.

Connect with Owners Around the World

Segway Social is a new networking website that is the perfect complement to the Segway mode of living. Read news, share photos and stories, tag places, map out your favorite glides, and learn about new ways to enjoy your Segway PT. With so many enthusiasts there's one thing for sure: Segway opens up a world of possibilities.

Join in the Segway love at <http://social.segway.com>

Avoid submerging your Segway PT in water or getting the charge port wet. Also avoid slippery surfaces. Experienced rider shown. See User Materials for more information.

The technology inside a Segway PT consists of an intelligent network of sensors, mechanical assemblies, and control systems that balance and move you on two wheels. The second you step on, five micro-machined gyroscopes and two accelerometers sense the changing terrain and your body position at 100 times per second – faster than your brain can think.

Better than ever

The latest advancements

LeanSteer™ technology – Redefining responsiveness

If Segway PTs were intuitive before, they're positively instinctive now, thanks to the latest innovation known as LeanSteer technology. The LeanSteer frame and handlebar tilt left and right in response to your body's natural inclination to lean into the direction you want to travel. With LeanSteer technology, the Segway PT seems to anticipate your every move, and adjusts to your slightest whim.

InfoKey™ controller – Totally wireless, total control.

It's a key. It's an information center. It's an alarm device. And each wireless InfoKey controller is uniquely programmed to start and lock a specific Segway PT. Slip your InfoKey controller into the dock on the

LeanSteer frame, slip it in your pocket, or wear it on a lanyard around your neck. Powered on, it provides real-time info on battery life, speed, and system performance. At your destination, it arms your Segway PT's built-in security features.

Anti-theft – Park it with confidence.

Every Segway PT has a built-in anti-theft system to discourage others from tampering with your Segway PT. Just press the security button on your InfoKey controller. If someone attempts to move your Segway PT in any way, an alarm will sound, your Segway PT will start vibrating, the wheels will lock, and a visual alert will be sent wirelessly to your InfoKey controller. Now that's sophisticated security.

Segway demystified

It's accepted.

The Segway PT is designed to operate as a pedestrian device anywhere someone can safely walk. Most jurisdictions and private properties allow Segway PTs in pedestrian areas. Check with local authorities and property owners before riding. Segway Inc. also maintains up-to-date information at www.segway.com/regulatory.

It's frugal.

The Segway PT is powered by a pair of lithium-ion batteries that automatically recharge when you ride downhill. Fresh out of hills? Just plug your Segway PT into any wall outlet. It takes about 15 minutes to get enough charge to travel one mile/1.6 km. A full day's charge costs less than a newspaper.

It's effortless.

The Segway PT's brushless motors are maintenance-free. There's no oil to change or clutch to replace. Just keep it charged, check the tire pressure and go.

It's trustworthy.

The Segway PT's platform features balance indicators that let you know it's safe to step on. They gently pulse to say "welcome aboard," and flicker in a chase pattern when you're balanced and ready to move. Multiple redundant subsystems work continuously to ensure that you remain balanced and come to a safe, controlled stop in the unlikely event of a component failure. If critical systems malfunction, your Segway PT will alert you with a gentle vibration of the platform, an audio signal, and details on your InfoKey controller.

It's tried and true.

During development, our engineers make sure that the Segway PT is subjected to millions of cycles of fatigue testing to ensure the highest quality, reliability, and durability.

Like with any transportation product, use of the Segway PT requires good judgment. Refer to and follow all instructions in the User Materials.

Minimalist design, multitude of uses.

The perfect synthesis of form, function and fun, the i2 lets you glide through your daily commute or zip from errand to errand without worrying about parking. The i2 can take you 24 miles/38 km or up to 480 city blocks on a single charge*, powering itself smoothly up or down stairs and curbs, and keeping you in control as it handles steep grades. Need to use more than one form of transportation? The versatile i2 can be easily stowed in the trunk of a car or carried onto many modes of public transit with permission. It's only fair to warn you, though: life on an i2 is highly addictive. Once you've experienced it, you'll find yourself constantly looking for opportunities to sail along the sidewalks.

Available in:
Gloss White
Anodized Black

Balance Indicator Lights

Charge Indicator Lights

Charge Port

Non-marking Tires

*24 miles/38 km is the maximum range for the i2 with lithium-ion batteries. Actual range depends on terrain, payload, and riding style.

Refer to and follow all instructions in the User Materials.

Weight		Tires		Footprint		Max Speed		Range	
105 lbs.	47.7 kg	19"	48 cm	19" x 25"	48.26 cm x 63.5 cm	12.5 mph	20 kph	Up to 24 mi	Up to 38 km

The i2 takes up about the same amount of surface area as an average adult, and has plenty of ground clearance for most urban and suburban settings.

Tuned for cross-terrain.

The x2's deeply treaded, all-terrain tires can master intimidating patches of dirt, gravel, grass, or sand. A special adaptation of Segway Inc.'s dynamic stabilization technology and a wider track maximize stability, while the x2's higher ground clearance ensures that steep hills, uneven trails, and errant rocks won't impede your ride. It can carry you up to 12 miles/19 km on a single charge,* and when you want to transport your x2 to an off-pavement destination, oversized handles make it easy to hoist it in or out of a vehicle. Plus, it makes the x2 cargo ready. Wherever your pursuit of the adrenaline rush takes you, pure exhilaration is sure to follow as the x2 propels you over the landscape, instantly responding to your every move. The x2 is also available with smooth turf tires (35"/88.9 cm wide).

InfoKey Controller

Scratch-Resistant Fenders

All-Terrain Tires

*12 miles/19 km is the maximum range for the x2 with lithium-ion batteries. Actual range depends on terrain, payload, and riding style.

The x2 is not intended for use on sidewalks or pedestrian walkways.

Refer to and follow all instructions in the User Materials.

Weight		Tires		Footprint		Max Speed		Range	
120 lbs.	54.4 kg	33"	83.82 cm	21" x 33"	53.34 cm x 83.82 cm	12.5 mph	20 kph	Up to 12 mi	Up to 19 km

The x2 has the size and muscle required for off-pavement and industrial use. Its knobby tires and protective fenders create a slightly larger footprint and increased ground clearance.

What can possibly make a Segway PT more remarkable? Outfitting it with accessories that will make your ride even more convenient and comfortable. As more and more police departments, security companies, manufacturing/distribution enterprises, and daily commuters have chosen the Segway PT as their preferred mode of transportation, many of their suggestions have inspired these specially designed accessory packages. Additional accessories are also available for a truly customized Segway experience. See page 26 for more information.

i2 Packages

i2 Commuter

The Commuter package equips the i2 with a handlebar bag for loose gear, comfort mats, a parking stand, Segway lock, and reflective labels for added visibility.

Also included:
LeanSteer Frame
Tool-less Release*
LED Taillight
Segway Lock Kit*
Segway Reflectivity

* Cannot be used at the same time.

i2 Police

With this package – including a handlebar bag for gear, an accessory bar for sirens and lights, comfort mats; cargo frames (that double as lift handles), LED taillight; and reflective labels – the i2 becomes the ideal personal transporter for urban police and private security officers.

Handlebar Bag

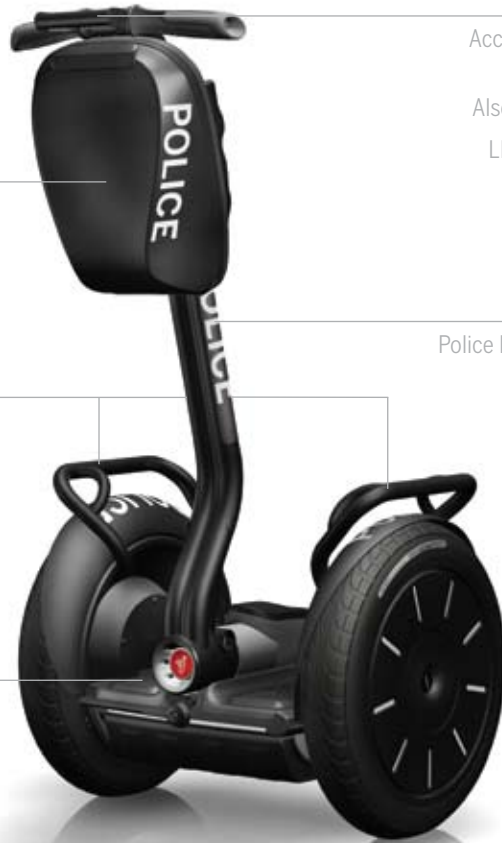

Accessory Bar

Also included:
LED Taillight

Police Reflectivity

Lower Cargo
Frames (2)

Comfort
Mats (1 set)

i2 Commercial Cargo

Ideal for light industrial applications, this package includes two lockable, waterproof, high-impact cargo cases that lock securely onto the Segway PT, cargo frames for up to 15 lbs./ 6.8 kg per side*, parking stand, and a LeanSteer frame height adjuster for easy transition between riders.

* Total rider + cargo payload should not exceed 260 lbs./118 kg.

Yes, it's rugged. Yes, it's tough. But equipped with one of our special accessory packages, the Segway x2 is also thoughtful for the environment and ready to have some fun. Whether you're playing golf, conquering the outdoors, or keeping watch over an expansive and physically demanding territory, an x2 package can make the off-pavement ride more comfortable and enjoyable. Additional accessories are also available for a truly customized Segway experience. See page 26 for more information.

x2 Packages

x2 Golf

Compared to a golf cart, this is a transportation hole-in-one: compact, fun, and easy to maneuver. The x2 Golf package includes 35"/88.9 cm low-pressure tires that barely disturb the turf, a scorecard holder, and a bag carrier that automatically positions your clubs upright after you step off.

Scorecard Holder

Accessory Bar

Golf Bag Carrier

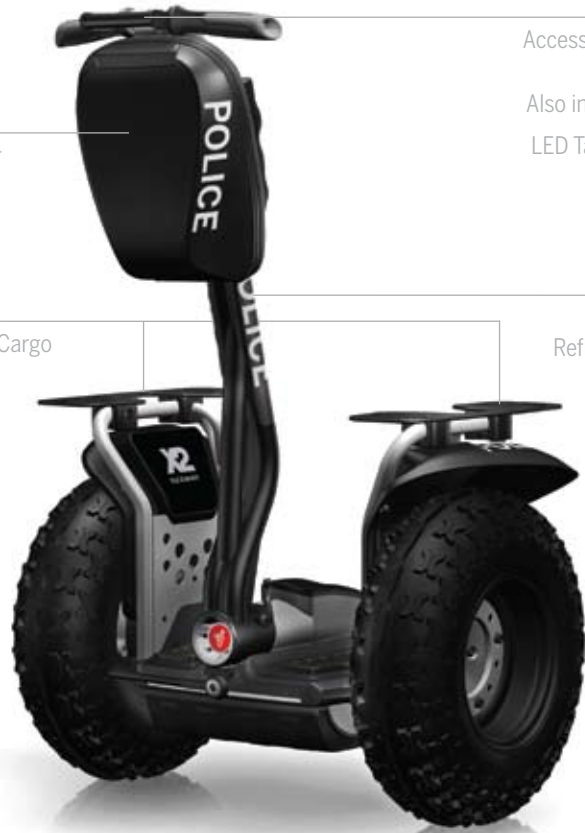

Smooth Turf Tires

Golf clubs, bag, balls and tees not included.

x2 Police

For officers patrolling parks, beaches or campgrounds, off-road capability is required for fast response. Necessary equipment also includes a handlebar bag, accessory bar for lights or sirens, universal cargo plates, LED taillight, and reflective labels.

Handlebar Bag

Universal Cargo Plates (2)

Accessory Bar

Also included:
LED Tail Light

Police Reflectivity

x2 Adventure

An x2 equipped with the Adventure package is an off-road machine that's ready to go. Included are a handlebar bag for water bottles and tools, an accessory bar, a Segway 5W LED headlamp, universal cargo plates for gear, and a LeanSteer frame tool-less release for easy transport and storage.

Segway 5W LED Headlamp

Handlebar Bag

Universal Cargo Plates (2)

Accessory Bar

Also included:
LeanSteer Frame
Tool-less Release

Make your Segway PT your own with accessories designed for safety, convenience, comfort, and utility. A wide range of options let you configure a truly “personal” transporter that suits your preferences and meets your needs.

Segway Accessories

Light it.

Segway 5W Lithium-ion LED Kit

Cut through the darkness with the most powerful single LED available. Shown at right with the Accessory Bar and Handlebar Bag, it offers low, high or flash beam settings. A lithium-ion battery provides six hours of high beam, and 40+ hours of flash. A double click powers on the light, preventing accidental use. When the battery is low, an auto-lock function extends performance. Also includes charger, case, and a two-year parts and labor warranty.

LED Taillight

Ideal for areas of heavy pedestrian and vehicle traffic or when it's dark outside, the LED taillight clips easily to your belt or backpack. Runs on two AA batteries (not included) to provide 15 to 18 hours of visibility.

Police Reflectivity

These durable, highly visible reflective labels clearly alert others in any light, and make it easier for officers to be seen in the dark, in a crowd, or during bad weather. Also available in Spanish, Italian, and German.

Segway Reflectivity

Sometimes the weather or ambient lighting can make it difficult to be seen. This kit helps you make sure your Segway PT stands out, no matter what the conditions. Simply attach the reflective labels and you're ready to be noticed.

Segway 3W LED Kit

Perched upon your accessory bar, this 65-lumen LED lights the way with low, high, and flash settings. Powered by 4 AA batteries (not included), it delivers two hours of high beam, four hours of low beam, and 20 hours of flash operation. And its solid aluminum housing stays cool to the touch. Two-year parts and labor warranty included. The Segway Accessory Bar is needed to install the light on your Segway PT.

Police Light and Siren

Specifically designed to meet the unique needs of police and security forces. A high-intensity LED alternating red-blue strobe increases visibility and a siren helps alert others of an officer's presence. Powered by a long-lasting lithium-ion battery for 40+ hours of strobe, and a seemingly endless siren. Includes charger, case, and a two-year parts and labor warranty.

Haul it.

Segway Ramp Kit

The ramps make getting a Segway PT into your vehicle a snap. The top grips your trunk while the traction foot helps anchor the ramps to the ground. Once they're in place, just roll your Segway PT up the ramp. When you're done, the ramps fold in half and fit into a custom carrying case for easy storage.

Segway Hauler

Take your Segway PT everywhere you travel. It works like a miniature forklift. Just remove the pin to lower the platform, roll your Segway PT on board, secure it, then push on the handlebar to raise it up. Compatible with standard 2"/5.08 cm and 1.25"/3.175 cm trailer hitches, it also adjusts to match the height of your vehicle.

Accessory Bar Kit

The accessory bar attaches to the handlebar, providing plenty of space to mount lights, reflective labels, and other aftermarket equipment. Simple to install, it's also adjustable, so you can angle it just the way you like.

Adjust it.

LeanSteer Frame Tool-less Release

With this essential accessory, a flip of a lever is all it takes to separate the LeanSteer frame so you can fit your transporter into tight storage spaces or place it in your vehicle.

LeanSteer Frame Tool-less Height Adjust

The turn knob adjustment lets you quickly configure the height of the handlebars – with no tools required. It also makes it easier to collapse the LeanSteer frame for storage or transport.

Carry it.

Handlebar Bag (above)

Yes, you can take it with you – keys, mobile phone, water bottle – all of life's necessities, including batteries for your accessories. A molded plastic shell protects your items and keeps them organized. When you get to your destination the bag detaches easily for carrying away. The exterior can be personalized with logos, reflectivity, or whatever you like.

Segway Hard Case by GIVI® (below)

Famous for their classic motorcycle cases, the designers at GIVI have created a signature case for Segway. A rugged outer shell protects your items from rain, sleet, and snow. Your valuables can be locked securely in the case and onto your Segway PT. And if you've got your own unique look, there's lots of room to customize. Cargo support kit included along with two-year warranty. The Segway Universal Cargo Plate is needed to install the case on your Segway PT.

i2 Lower Cargo Frame Kit (left)

Made of non-corrosive aluminum tubing with a weather-resistant powder-coated finish, this cargo frame gives you the leverage needed to lift and move a Segway PT with ease. Once installed, it accommodates lighting, cargo, or anything else you need to bring along on your ride.

Universal Cargo Plate Kit (above)

Whether you're using your Segway PT for work or play, equip it with a larger carrying area with this multifunctional cargo plate. Bungee hooks and cargo nets can be used for expanded flexibility. It can be installed in two positions for your preferred configuration and if you have an i2, requires the Lower Frame Kit (shown at left).

Detail it.

Aluminum Mat

These curving polished aluminum mats hug the base, brilliantly reflecting the light and begging you to step up to the slip-resistant, contoured rubber pads. Two mats create one set.

Comfort Mat

Cushioned by thick, industrial grade rubber that absorbs shocks and jolts, the comfort mat allows you to ride on and on without getting fatigued. Two mats create one set.

Charge it.

Off-Board Charger

Charge up to two spare batteries at the same time. Small enough to take with you in your cargo bag, it can be used for all battery types to ensure you've always got the power you need.

Lithium-ion Battery

Developed with Valence Technology Saphion® lithium-ion batteries run up to 24 miles/38.6 km on a single charge depending on model, terrain, payload, and riding style. These low-maintenance, long-life batteries can operate at temperatures as low as 14° F/-10° C. One-year warranty.

Park it.

Parking Stand

If you need to leave your Segway PT, the parking stand easily pivots down to offer support while you go about your business. When not in use, it aligns discretely against the chassis. Available for both i2 and x2 models.

Lock it.

Segway Lock Kit

Secure your Segway PT to any immovable object. This durable lock can be used almost anywhere – including with the Segway Hauler. It comes with components to make it compatible with older Segway PTs. Highly visible, it's a convincing deterrent for would-be thieves. The 28"/71 cm cable with lock comes with two keys. Not compatible with the Tool-less release.

Protect it.

InfoKey Controller Skin

Protect your Wireless InfoKey Controller from incidental damage with this custom-fit cover. It wraps snugly around the case of your InfoKey Controller and has a clear plastic shield for the display to discourage scratches. Made from a thin rubberized material, it grips the InfoKey controller tightly and has indentations to indicate the Power/Standby Button.

Wear it.

Segway Signature Gear

Declare yourself an official Segway aficionado with your own signature wardrobe. Don your cap while gliding through your day. Wear your t-shirt and be prepared for the question, "Do you own a Segway PT?" Grab a jacket for those chilly days. Road tested by loyal Segway fans, these fashions are a definite must.

Get it.
