**Installation of Accessories**

1. **Install the Rear Spoiler**
   - Insert the rear spoiler bracket into the slot.
   - Use the 2.5 mm hex wrench to tighten the 6 screws into the main body of the rear spoiler.
   - Assemble the support rods and insert the steering bar into the S-Max body.
   - Put the cap on.

2. **Install the Ninebot Engine Speaker**
   - Remove the S-Max body from the Gokart and open the App.
   - Click Vehicle > Search device to connect to your S-Max.
   - The Gokart will automatically power off when idle for 10 minutes.
   - Before first use, please activate your Gokart via the App (The screw is set to a depth of about 1 cm extension cord).
   - Press the disassembly switch to unplug the power supply.
   - Disconnect the App from the Gokart first, confirm that the indicator light of the Gokart is flashing blue, and then pair the Speaker with Bluetooth 4.1 or above, connect to the S-Max with Bluetooth, and follow the App instructions to activate your S-Max and follow exercises.

3. **Before the First Drive**
   - Lift the guide bar to help steer the S-Max without a rider when powered on.
   - There are safety risks when learning to ride the S-Max. You must read the Safety Instructions and follow the New Rider Tutorial before first use.
   - WARNING: Avoid areas with high pedestrian or vehicle density.

4. **Warnings and Cautions**
   - Do not expose the vehicle in the rain or ride it in the rain for a long period of time.
   - The standby time is around 120 to 180 days when the battery is fully charged. Please charge the battery in time or over-discharging may cause damage.
   - Charge the battery in time to avoid over-discharging and cause damage.
   - Fastening the seat belt before riding. (The screw is set to a depth of about 1 cm extension cord).
   - WARNING: Do not start the Gokart with a rider.
   - WARNING: Avoid riding on unstable surfaces.

**Adjustment**

1. **Adjust the knee pads**
   - Lift the knee pads to the desired height.
   - Rotate the height adjustment knob clockwise to tighten.
   - Lift the guide bar to help steer the S-Max without a rider when powered on.
   - WARNING: Avoid areas with high pedestrian or vehicle density.

2. **Adjust the steering wheel height**
   - Adjust the steering wheel height (Tighten the quick release nut.
   - Raise the steering wheel to a suitable height.
   - Loosen the traps and take out the speaker before adjusting the corresponding height.
   - Align the scalable structure of the frame with the connection tube in order, as shown in the figure on the left.

3. **Before the First Drive**
   - Lift the guide bar to help steer the S-Max without a rider when powered on.
   - There are safety risks when learning to ride the S-Max. You must read the Safety Instructions and follow the New Rider Tutorial before first use.
